Free Website Safety & Security Checker

Tools and Services ▼

Our Free Website Safety & Security Checker checks the safety of public-facing websites. All you need to do is enter a website URL and our tool will examine over 80 databases (from companies such as Google, Comodo, Opera, and Securi) to determine if it has been compromised by any scams, viruses or malware. Our link safety checker can help you decide if the website is safe to visit and share information with. It can also do a quick [SSL Certificates](#) to make sure the site's security certificate is valid and secure. Remember: No website is 100% safe, so we recommend you always use caution when sharing sensitive information.
